

SYSTEXX PURE - WALL AND CEILING COVERINGS FEATURING PURIST TEXTURES

IN TUNE WITH SPACE AND TIME

SYSTEXX 
by Vitruvan

INNOVATIVE GLASS FABRIC FOR WALLS AND CEILINGS

SUBTLE AND UNOBTRUSIVE OR STRIKING AND UNIQUE:

LESS IS MORE

→ **SYSTEXX Pure** offers countless design options for your rooms. Straight lines, well-defined textures and perfectly smooth surfaces create a calm setting and deliberately enhance the purist look of your walls. In addition, this minimalism also provides the ideal basis for sophisticated stucco techniques or color combinations. All wall coverings included in the SYSTEXX Pure range offer the same technical benefits as glass fiber wall coverings: they are crack-bridging, impact-resistant, fire-resistant and non-hazardous to health.

In addition to a multitude of patterns and glass fleeces, the **SYSTEXX Pure** range now also features an Effect Print design. Extremely fine sand is applied to a perfectly smooth glass fleece with a special printing technology and creates impressive effects that vary depending on how the light falls on the design.

DIVE INTO A WORLD OF COLORS

CHANGE MOOD WITH COLOR

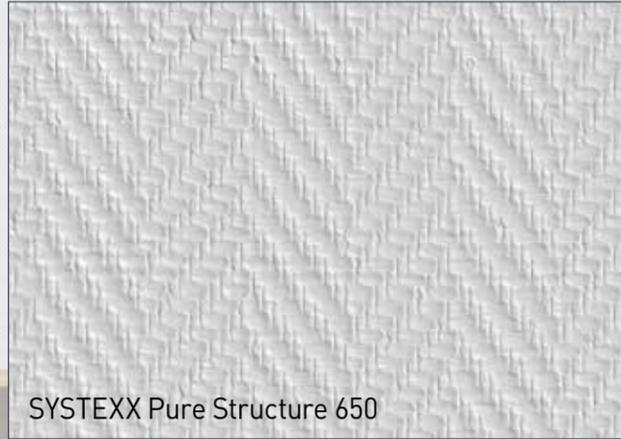

Although the texture of a wall covering is important for setting the atmosphere of a room, it is the combination with matching colors that creates a special room ambiance. The color scheme determines whether the wall blends in unobtrusively with the background or becomes an effective eyecatcher.

Dive into the **SYSTEXX Pure** world of color designs and find out on the following pages how to give your rooms the desired mood with striking arrangements.

SYSTEXX PURE FLEECE V11, V14, V16, V22 AND SILK 060

FOR PERFECTLY SMOOTH WALLS

Immaculate and beautiful: the **SYSTEXX glass fleeces** in particular can be hung without any visible joints. The resulting smooth surface makes an ideal foundation for decorative coatings and stucco techniques. The glass fleece also holds its shape well and can be repainted many times.

And for those who want more technical performance, yet still want smooth walls:

SYSTEXX Pure Silk 060 glass fabric bridges existing cracks and effectively prevents new ones from forming. The result is a virtually smooth wall that is protected against damage from knocks and scrapes.

SYSTEXX Pure Fleece V11: Easy handling, especially on overhead jobs

SYSTEXX Pure Fleece V14: The all-rounder for standard interior applications (walls & ceilings)

SYSTEXX Pure Fleece V16: Easily repositionable all-rounder – perfect for butt joints

SYSTEXX Pure Fleece V22: Completely smooth basis for thin coatings and applications

SYSTEXX Pure Silk 060: Minimalistic, virtually smooth design with maximum technical performance

SYSTEXX PURE SKYLINE EP88

CITY LIGHTS

The tallest buildings reach into the sky at dizzying heights. People feel tiny and miniscule when standing at the bottom, but they feel like the king of the world on the viewing platform. The smooth façades mirror each other and reflect the city lights. Many cities are known for their unique distinctive skylines which are visible from a distance. **SYSTEXX Pure Skyline** brings this uniqueness into your home.

SYSTEXX Pure Skyline is a glass fleece on which extremely fine sand has been applied using a special printing technology. It creates impressive effects that vary depending on the coating and on how the light falls on the design.
